

GREEN SOLUTIONS

Production Plus Technologies Inc. strives to make a big impact on our clients while making little impact on our planet. We are constantly rethinking our processes to work toward an environment that will benefit both our clients and future generations through a cleaner planet.

REDUCE

- Reduce waste lumber through planning for maximum yield.
- Reduce energy consumption through use of low energy lighting (fluorescent) throughout main building.
- Reduce waste of sheet material through grouping and building of efficient cut paths to have maximum yield and minimum waste.
- Reduce use of forestry products through the use of steel, aluminum, and engineered lumber products.
- Reduce air pollution through the use of water based paints and sealers.
- Reduce pollution through the use of solvent free adhesives, cleaners and non-solvent UV cured inks.

REUSE

- Reusable signage is designed and encouraged.
- Leftover paint is used as backpaint.
- Many scenic items are created as long term stock items for rental.

RECYCLE

- Reusable signage is designed and encouraged.
- Leftover paint is used as backpaint.
- Many scenic items are created as long term stock items for rental.

ECO-FRIENDLY

- Large format printer eco-friendly and uses entirely non-solvent UV Cured inks
- Framing lumber harvested from sustainable farms.
- Sustainable flooring and lumber options available. Including cork, bamboo, recycled plastics, and engineered lumber.
- Scenic fabrics made entirely of cotton.
